

11/8/2022 6:49 AM

Dear **P.S. 106 Parkchester** at **1514 OLMSTEAD AVENUE** community,

I am writing to notify you that a member or members of our school community have tested positive for COVID-19 and may have exposed others while at school.

Below you will find guidance on next steps that will help keep our school community healthy and safe. The information below reflects the expertise of the Department of Health & Mental Hygiene (DOHMH), Test & Trace Corp (T2), and the New York City Department of Education (DOE).

Note: DOHMH has issued new guidance due to the current transmission level of COVID. All people, regardless of vaccination status are strongly encouraged to wear masks at all times when indoors in a public setting. Please see the [DOHMH advisory](#) for more information.

What Happens Now?

- **Students** and staff who shared classroom space with the individual who tested positive will receive at-home tests with guidance and directions. All may continue to attend school as long as they test negative for COVID and have no COVID like symptoms.
- The Situation Room will monitor our school for any further interventions.
- Anyone with a positive COVID-19 test will not return to the school until they are no longer infectious.
- If your child is feeling sick, keep them at home.

How do we stay healthy?

We strongly encourage the COVID-19 vaccination for all age-eligible students. Find a vaccine site today at <https://vaccinefinder.nyc.gov/>. There is no cost to be vaccinated.

Vaccine booster shots are now available for all fully vaccinated New Yorkers 5 years and older. These shots boost your immunity from an initial vaccination series. A booster shot is recommended for any adult who received the second dose of the Pfizer vaccine at least five months ago, the second dose of the Moderna vaccine at least six months ago, or the one dose of the Johnson & Johnson vaccine at least two months ago.

Please remember to follow these important actions to prevent COVID-19 transmission:

1. Stay home if sick (except to get essential medical care, including COVID-19 testing).
2. Wear a face covering if you are symptomatic or exposed to reduce the spread of COVID-19.
3. Practice healthy hand hygiene: Wash your hands often or use an alcohol-based hand sanitizer; avoid touching your face; and cover your cough or sneeze with your arm, not your hands.

How can I stay updated?

We will continue to closely follow directions from public health experts and proactively update you on any measures we are taking. To ensure we can reach you via text and email, please create a New York City Schools Account (NYCSA) as soon as possible by visiting schools.nyc.gov/nycsa

For additional information on COVID-19, visit schools.nyc.gov/coronavirus or call 311.

Sincerely,

EUGENIA MONTALVO
